

I have been very pleased with my XM Satellite radio service. No one can duplicate the variety and the convenience of listening to XM Satellite Radio and its traffic and weather channels. I travel all over the country and would always be searching for a "good" station, now I have one... all the time... that gives me music, traffic and weather. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I want, deserve and am currently receiving from XM radio. You should be protecting my rights to listen to my stations of choice not protecting NAB's memberships to monopolize traffic and weather information. Would not you want this vital information to reach as many members of the public as conveniently as possible. Why on earth would you limit my ability to receive it.
